

## 7077/4RG PROOF Mercury Cinque

Certified 5 levels self-loading stretcher with 4 swivel wheels - high version

### FEATURES

[Visit Mercury Cinque website](#)

**Mercury Cinque** high version. It is derived from one of the most successful projects in the field of rescue, certainly the Me.Ber product. Most appreciated, the Mercury 4RG. Mercury Cinque is intended to further extend the operational capabilities of the original model by introducing 5-level logic, five heights, as they are commonly called. Mercury Cinque is much more than an evolution though! It is the only five-height with a folding front trolley (on the other hand, what do you need a stretcher to help you load a patient from his bed, if you can't get through the narrow spaces of a house?) also the only one that guarantees you the maximum capacity of 250kg on all five levels.

#### 5 LEVELS

*Loading height - LOAD LEVEL:*

Loading on the vehicle, handling on the ground, final transfer to the emergency room or operating room, treatment or triage on the site.

*High rescue - HIGH LEVEL*

Suitable as a resting position. Ideal height for the placement of a spinalized patient.

*High Bed - INTERMEDIATE*

Typical height of a hospital bed or height suitable for seating ambulatory patients. Ideal height to transfer the patient from stretcher to chair and vice versa.

*Bed or Sofa - LOW LEVEL*

Typical height of a sofa or a bed. This height allows easy transfer of a collaborating patient and simplifies the transfer on the stretcher.

*Ground level rescue - BASE LEVEL*

At only 30cm from the ground, it allows all conventional operations with a maximum load of 250kg.

#### Mean features:

- 250 kg Maximum load capacity on all heights

#### Folding front trolley

Ergonomics for back pain: the stretcher controls and general ergonomics are designed not to overload the rescuer, especially to relieve the load on the back.

200mm wheels to overcome any roughness. Greater comfort for the patient and great safety for rescuers who can move easily even in the presence of uneven ground and surfaces.

4 swivel wheels for safe manoeuvring at all times. Mercury Cinque has all four swivel wheels. A simple command allows the unlocking of the rotation of the front wheels for maximum manoeuvrability.

Reflective decorations. To improve the visibility of the stretcher in the roadside assistance context at night, reflective stickers were used in various points.

Compatible with art. 955 fixing system.

MAIN FEATURES

Usage	Transport
10G Certification	
Max loading height (cm)	71
Min loading height (cm)	69
Folded height (cm)	31
Length (cm)	197
Length with folded trolley (cm)	167
Width (cm)	57
Weight (kg)	49,5
Loading capacity (kg)	250
Multilevel	
Max height (cm)	101
Min height (cm)	37
Type	Self loading stretcher
